Tub Grinder

(For Serial Number Up To 23-2-GJ-0190)

Manual 2: Parts Reference

DuraTech Industries International Inc. (DuraTech) has made every effort to assure that this manual completely and accurately describes the operation and maintenance of the 1150TM / 1155TM Haybuster Tub Grinders as of the date of publication. DuraTech reserves the right to make updates to the machine from time to time. Even in the event of such updates, you should still find this manual to be appropriate for the safe operation and maintenance of your unit.

This manual, as well as materials provided by component suppliers to DuraTech are all considered to be part of the information package. Every operator is required to read and understand these manuals, and they should be located within easy access for periodic review.

 **DURATECH**® &  **HAYBUSTER**® are registered trademarks of Duratech Industries International, Inc.

FOREWORD

Foreword

All personnel must read and understand the following sections before operating the 1150/1155 Haybuster Tub Grinders.

- Foreword and Section 1, important safety information.
- Section 3, “Machine operation,” which explains normal operation of the machine.
- Section 3.1, “Pre-Operation Inspection”.

Appropriate use of unit

The 1150/1155 Haybuster Tub Grinders are designed to grind material into more palatable or manageable rations for your operation. It has multiple uses:

1. Grind most types of hay
 - Big round bales
 - Loose hay
 - Square bales
2. Grind most types of grain
 - Ear corn
 - Shell corn
 - High moisture corn
 - Most small grains

TABLE OF CONTENTS

3. Grind most types of crop residue
 - Stover
 - Straw
4. Grind various sizes
 - Screens are available from 1/8" to 8"
 - Combine screen sizes to get desired cut

Operator protection

As with all machinery, care needs to be taken in order to insure the safety of the operator and those in the surrounding area.

WARNING: The **OPERATOR IS RESPONSIBLE** for the safety of the operator and those in the surrounding area. Operators and those observing the operation of the 1150/1155 Haybuster Tub Grinder are recommended to wear head, eye, and ear protection, No loose clothing is allowed.

FLOW CONTROL VALVE - CV98 - 4300069

Starting Point/Manual Override Adjustment

The starting point is preset to 0 GPM. If any further adjustment is required;
 1- Loosen jam nut. 2- Turn the adjusting screw clockwise to increase the flow or counter clockwise to decrease flow. 3- Gently tighten the jam nut.

WARNING- If the adjusting screw is turned to far counter clockwise, the valve will behave erratically or stop working all together. Turn the adjusting screw no more than 1/16 to 1/8 of a turn counter clockwise after flow has stopped.

For manual operation when electrical control fails, turn the adjusting screw clockwise until the desired constant flow is obtain.

PART	QTY	DESCRIPTION
		CV98
4300069	1	Valve\Servo\25gpm\24vDC
4300054		Solenoid\Hyd Valve\24V, see notes below

Note - The difference between the 12Volt and 24Volt solenoid is listed on the serial number plates.

The solenoids are Elwood 160261-xx6 or 160261-xx9. The 6 is a 12 volt solenoid, the 9 is a 24 volt solenoid. Also, 12 or 24 are stamped on the newest serial number plates.

ELECTRO-HYDRAULIC VALVE CALIBRATION - S.N. GJ0167 & UP

To calibrate the electro-hydraulic valve coil after following the three steps above, perform the following steps:

1. Shut down the machine using the normal shutdown procedure in this manual
2. Disconnect the wiring harness from the electro-hydraulic valve coil.
3. Remove the acorn nut from the end of the electro-hydraulic valve. This will reveal a jam nut and an adjusting stud with a screwdriver slot.
4. Loosen the jam nut.
5. Turn the adjusting screw counterclockwise until it stops.
6. Lock the adjusting screw with the jam nut and replace the acorn nut. Reconnect the wiring harness to the electro-hydraulic valve coil.

Grain Hopper Option Installation:

1. Orient tub to the transport position.
2. Bolt front(Item 3) and rear(Item 2) covers to grain hopper with hardware.
Check to see that hopper baffle orientation is correct.
3. Place rounded end of hopper tight against the tub seal ring.
4. Check to see the hopper is centered side to side over rotor.
5. Drill four 7/16" holes through tub floor using hopper as guide.
6. Secure hopper to the floor with provided 3/8" hardware.

IMPORTANT! DO NOT ROTATE TUB WITH HOPPER INSTALLED
